Ahoj, Riešil niekto opravu brzdových strmenov na cf moto x1000? Už som zúfalý z toho. Nikde nemôžem nič nájsť. Podarilo sa mi do pasovať prachovky ale treba mi ešte gumičky na zadnej strane tej tyčky, na ktorú sa srubuje valček. Viete poradiť ? Rozmery gumičky vnútorný priemer je 7 mm a vonkajší je 12.5 mm Ďakujem

Okay, this sounds like a frustrating problem! I haven't personally worked on the brake calipers of a CF Moto X1000, but I know how tough it can be to find specific parts for ATVs. Have you tried checking online forums dedicated to CF Moto owners? Often, people share part numbers and repair tips there. Also, sometimes generic brake caliper repair kits have a variety of seals and O-rings that might include the size you need. While you're digging around online, maybe take a quick break and clear your head with something completely different - I find a quick round of [Slope Unblocked](#) can do the trick! Good luck with the repair; hope you find the right seals soon!

Encountering a frustrating problem often feels like an uphill battle. It's not uncommon to face difficulties with specific parts, especially for unique vehicles like the CF Moto X1000. I once struggled with getting the right components for my motorcycle, which seemed like an endless search. I stumbled upon an online forum where enthusiasts shared invaluable insights, much like how players share strategies in [Slither io](#) to conquer challenges. Don't hesitate to ask for help and explore various resources; you might just find the right solution quickly.
