If you enjoy physics-based platformers like Hill Climb Racing but want something more 3D and punishing, you need to check out Drive Mad. The game challenges you to balance speed and stability across increasingly creative obstacle courses. Each stage is a puzzle; sometimes you need to be slow and methodical, other times you just have to floor it and hope for the best. The voxel art style is clean, and the car destruction is oddly satisfying. Key Highlights: Creative level design (bridges, loops, and moving platforms). Unique car physics for every stage. Instant restarts for that one more try feeling. Check it out: [drive mad 3](#)
