; Suika Game is a fun little physics game that originated in Japan and has recently gained popularity worldwide. It is also known as the Watermelon Game. The objective of the game is to drop fruits into a container and combine two matching fruits into a bigger fruit. The aim is to reach the final fruit, which is a watermelon, or last as long as possible before the fruit pile reaches the top of the container. The game is like a cross between 2048 and Tetris, but with physics.
