tread lightly!  All specifications, claims, prices and information contained within are based upon current knowledge as of May 1, 2010 and are subject to change without notice. Prices do not include freight, handling or setup charges. ATVs and ROVs can be hazardous to operate. For your safety always wear a helmet, eye protection, and protective clothing. Never ride on paved surfaces or public roads. Never carry a passenger on a single-rider ATV; never engage in stunt driving; riding and alcohol/drugs don't mix and could cause injury or even death. Avoid excessive speeds and be particularly careful on difficult terrain. Only ride an ATV that is right for your age. Supervise riders younger than 16. Always wear a seat belt on ROVs. Never carry a passenger in the cargo box or a passenger under age 6. Passenger must be able to place both feet on the floor while keeping their back against the back of the seat. Arctic Cat recommends that all riders take a training course, and that they read and understand their owner's manual before operation. Along with concerned conservationists everywhere, Arctic Cat urges you to "Tread Lightly" on public and private lands. Ride only on designated areas or trails. Preserve your future riding opportunities by showing respect for the environment, local laws, and the rights of other recreationists when riding. For safety or training information in the U.S., call the ATV Safety Institute at (800) 887-2887. In Canada, please contact the Canada Safety Council at (613) 739-1535 or see your dealer. THE TOOLS YOU NEED TO
WORK AND PLAY EVEN HARDER

THIS AIN'T BATHROOM READING.

Or maybe it is. Maybe it's waitin'-for-your-buddy-to-load-the-trailer reading. Could be the type of reading you get done over a nice venison steak. Well, wherever you read it, this here is stuff you'll want to spend some quality time with. These pages hold a ton of good stuff that'll make your ride even better. We've got everything from winches and gun racks to mowers and planters. For you Prowler® guys, we've got you covered from tires to roof. So go on, take a look inside. And when you're done, don't forget to wash up.

PROWLER

The Arctic Cat® Prowler is the ultimate machine. The ultimate recreation machine. The ultimate utility machine. The ultimate hunting machine. But within these pages is a gold mine of parts, accessories and upgrades you can use to make your ultimate machine even better.

REMINGTON®

You've got your game. Now what? You could probably throw it over your shoulders and lug it on home, but you deserve better. So toss the beast in the back of your Arctic Cat ATV and head to camp in style. Check out page 25 to see what we mean. Now this is how hunters gather.

SPEEDPOINT

The best kind of work isn't work at all. Because when you can do your chores on your Arctic Cat ATV, things like landscaping, planting and plowing become a lot more fun. And the unique SPEEDPoint™ design is a breeze to take off and put on, which makes turning work into play much easier.

TIGER TRAX/PLOW

When there's a big chunk of snow or dirt in front of you, don't go around it. Go through it. Strap a durable plow onto the front of your ATV and go to town. And if the surface calls for something a little more than tires, outfit your machine with a versatile Tiger Trax Kit.

WHEN YOU BRING DOWN BIGFOOT, YOU'LL NEED A WAY TO DRAG HIM HOME.

YOUR WORK IS YOUR PLAY.

PROWLER SPEEDPOINT

Our Prowler SPEEDPoint system makes the work you do feel more like play. It allows the changing of any implement — from a planter to a landscape rake — in just minutes! That's precisely the kind of convenience Prowler SPEEDPoint gives you, without ever having to lock the rear suspension and sacrifice maneuverability under heavy payloads. Just back up to the Prowler SPEEDPoint attachment, hook it onto a 2-inch ball, connect the wiring harness and you're good to go. Raise and lower implements with the flick of a dash-mounted switch. Simple as that. No more grunting or groaning. It's almost like this whole business of hard work just became fun again.

Note: Prowler SPEEDPoint requires a 12-volt mini-motion electric/hydraulic actuator package (1436-269, sold separately) for implement adjustment. The actuator is easily removed with two pins and a wire connection and transfers to all Prowler SPEEDPoint attachments. Wiring harness required (1436-301).
